

their safety is essential.
Products made to work hard—and built to last.

Fail-Safe® MilBerm™

Heavy-duty construction provides long-term spill containment for vehicles, heavy equipment, tankers, generators, and more

- Single-piece construction—patented wall-support system integral to berm provides unobstructed work space
- Provides faster deployment—stronger structural integrity
- Quick and easy setup—no assembly required
- Heavy-duty BC3CF fabric stands up to corrosive solvents and extended wear
- Fail-Safe® flotation device on entry/exit walls, enabling drive-in and drive-out with no need to raise or lower wall
- When in the upright and locked position, wall supports prevent snow and ice from interfering during a spill occurrence

Fail-Safe® flotation device incorporated on entry/exit walls.

Clean lines of the berm with no obstruction either on the berm interior or exterior.

No assembly needed—
saves time, ready
in minutes!

Unfold berm, exposing supports in flat position.

A simple tug locks supports in upright position.

Fully deployed for quick spill readiness!

Reinforced, wraparound design prevents seam leaks for fluid-tight reliability.

The Fail-Safe® MilBerm™ offers superior protection and chemical resistance against the harshest of liquids, including petroleum, oils, greases, and most acids.

Unlike floating-wall-type berms that are susceptible to wall collapse and containment failure, the patented wall support design features a stainless steel brace that supports the wall at a full 90° locked position for secure, leakproof containment. A simple push on the walls unlocks the support and lays the wall down for drive-through capability from any angle. The end walls also feature the patented Fail-Safe® flotation device that allows the user to leave the entry/exit walls in the down position, weather permitting. This feature enables the walls to auto-deploy to the upright position using the dynamics of fluid pressure to push the wall up without allowing a spill event. The end walls also include the wall support with locking detent to keep the end walls upright should snow or ice be forecasted.

Folded Fail-Safe® MilBerm™ securely attached to the HEMTT tanker for deployment at a moment's notice.

The ingenious Fail-Safe® MilBerm™ built-in wall support design deploys instantly while minimizing drive-over damage and tripping hazards.

The built-in patented wall supports maximize usable space inside the berm and greatly reduce any tripping hazard on the berm perimeter. Reinforced corner design with wraparound diagonal radio frequency welds offers exceptionally strong structural integrity to prevent seam leaks, provide fluid-tight reliability, and extend berm life expectancy. Finished hem edge on top of sidewall prevents fraying and adds strength. Each support includes a built-in staking point for anchoring the berm under high wind conditions. Anchor stakes are not included.

Helps comply with EPA for containment and spill prevention (SPCC).

Patented support mechanism

Sets up to a 90° locked position. Integrated holes in hub permit easy anchoring.

Stainless steel support is encased in protective hub to withstand vehicle traffic.

Fail-Safe® flotation device on both the entry and exit walls is self-erecting and will rise as the fluid level rises. The entry/exit walls also have the brace support, which will lock into position with the rising fluid level.

Corner construction

Reinforced, wraparound design prevents seam leaks for fluid-tight reliability.

Dimensions W x L x H	Capacity	Weight	Folded Size	Part No	Application
4 ft x 6 ft x 1 ft 1.2 m x 1.8 m x 0.3 m	179 gal 678 L	28 lbs 13 kg	30 in x 30 in x 6 in 762 mm x 762 mm x 152 mm	1055-02003-105	Small generators/ POL storage

Military Environmental Stewardship

With more than 25 years of trusted expertise in spill containment, Justrite offers military-approved containment solutions designed for efficient transport and deployment in the field. Flexible Fail-Safe® MilBerm™ features easy portability and fast deployment. It complies with local, state, and federal environmental spill regulations, as well as branch-specific regulations.

Army Regulation 200-1 – Environmental Protection and Enhancement

“The Army is committed to environmental stewardship in all actions as an integral part of the Army mission.

Marine regulation MCO P5090.2A – Environmental Compliance and Protection Manual

“The Marine Corps shall actively protect and enhance the quality of the environment through strict compliance with all applicable regulatory requirements.”

Reference (FM 3-100-4/MCRP 4-11B Environmental Consideration in Military Operations)

Justrite is committed to designing and manufacturing spill prevention products to help implement brand-specific regulations and standard operating procedures. Standard and custom sizes are available to meet Spill Prevention Control and Containment Plan requirements.
