Modular Channel QuickBerm®

Portable, liquid-tight containment for hoses and pipes

- Flexible modular design allows you to form any configuration
- Standard 4-ft width—custom sizes available
- No assembly required—sets up easily in the field
- Proprietary design with input from the U.S. military

The Modular Channel QuickBerm's folding brace system features supports that lock the wall in an 8-in-tall, 90° vertical position when deployed. The inclined leg support is only 1.5-in from the ground for mobility and ease of use. Simply pull up on the perimeter wall and the unit will lock into a vertical position. To lower the wall, push in on it and the lock will release, allowing the Modular Channel QuickBerm® to lie flat on the floor.

Each section has open ends and tongue-and-groove closures that form a liquid-tight closure.

Sections attach quickly with a state-of-the-art LiquidSeal™ resealable connection that provides a liquid-tight closure.
